McFarland Cascade to participate in Whatcom County Home & Garden Show
Consumers can learn about outdoor living solutions at Windsor Plywood booth

Lynden, Wash.—At the Whatcom County Home & Garden Show March 2-4, consumers can learn about innovative decking solutions from McFarland Cascade at the Windsor Plywood booth.

McFarland Cascade Territory Manager Matt Wittshiebe will be on hand to answer questions, provide general estimates, and discuss ideas with customers who want to create customized outdoor living options. At the booth, consumers can learn how they can get McFarland Cascade's "Do It Yourself" deck design software and pick up product samples and information.

The booth includes a 20 x 20 foot true-scale model of McFarland Cascade's premier decking and railing line. People can walk on the deck surfaces, inspect the products, and ask questions about these popular products:

- **Stonedeck™**—Featured in Sunset Magazine in August of 2005 and 2006, these light-weight natural stone tiles backed with a high-strength composite will install on standard above ground deck frames with no additional substructure required. Stonedek can be used for an entire project or as an accent.
- **Extreme Tropical Hardwoods®**—When nothing but real wood will do, McFarland Cascade's Extreme Tropical Hardwood line offer richness and durability that choosy customers appreciate. Their dramatic grains and distinctive colors can add value and elegance to any home, while their natural resistance to fungi and termites offer maintenance benefits.
- **Xtendex®**—A rice-hull-based composite that naturally resists insects and mold, Xtendex features the Quick Clip no-visible-screw building system. This wood-free choice is more stain and scratch resistant than most other composite options and installs in up to half the time. It combines principals of conservation with practical engineering and ease of use.
- **RhinoDeck®**—Recognized as a quality wood alternative in the building industry, this composite decking system is comprised of 50 percent recycled high-density polyethylene (HDPE) and 50 percent recycled wood fibers. People who have used RhinoDeck have helped America recycle more than one billion plastic containers a year. It's splinter free, requires no painting or staining, and installs like traditional wood.

- more -

- **Rain Escape**—Homeowners can maximize outdoor living spaces—even during rainy days—by transforming unsightly under-deck overhangs into dry and attractive usable spaces. Gain an outdoor living room or a dry storage space for lawn and gardening equipment, bikes, and more.

For more information, or to receive McFarland Cascade’s catalogue featuring its complete line of products, call (800) 426-8430, or download it online at www.mcfarlandcascade.com.

The Whatcom County Home & Garden Show takes place at the Northwest Washington Fairgrounds from 10 a.m. to 9 p.m. March 2 and 3 and 10 a.m. to 6 p.m. March 4. Admission is \$6 for adults (over 16); \$5 for seniors (55 plus); and free for children (under 16). For more information on the show, please call (360) 671-4247 or visit www.whatcomhomeshow.com.

McFarland Cascade—the outdoor projects people—enhances the quality, style and comfort of exterior home projects. A manufacturer and distributor of pressure-treated lumber, composite decking and other products that are sold through quality retailers throughout the West, the company began as a producer of poles and pilings in Sandpoint, Idaho in 1916.
