McFarland Cascade to showcase new decking products

Home Improvement and Remodeling Show™ Sept. 25-28 to feature outdoor living solutions

Portland, Ore.—Looking for alternatives to the standard decking options? At the 33rd Annual Home Improvement & Remodeling Show™ Sept. 25-28, McFarland Cascade will showcase unique and highly functional decking and railing solutions—for a fresh look and a great investment.

New this year is Terratec Naturals, one of *Professional Remodeling Magazine's* Top 50 Most Innovative New Products, the composite decking solution that prevents mold and moisture and makes use of rice hulls to protect the environment; and Prefinished Extreme Tropical Hardwoods, already stained and sealed on three sides to save valuable time and add convenience.

At McFarland Cascade's booth number 1021 show visitors can walk on the deck surfaces, inspect the products, get product samples and product information. McFarland Cascade Area Sales Manager John Hedges as well as McFarland Cascade Certified contractors will be on hand to answer questions, provide general estimates, and discuss ideas with customers who want to create customized outdoor living options. The certified contractors will include Jason Thorp of Gresham's Thorp Construction; Reese Anderson of Tigard's Northwest Fence and Deck; Romi Botez of Tualatin's American Classic Deck; John Breiling of Lake Oswego's Northwest Exteriors; and Adrian Petrisor of Aloha's Adrian Quality Fence & Deck.

McFarland Cascade's premier decking and railing line that will be on display at the show includes:

- **Terratec Naturals**—Introduced to the western U.S. market in July, this eco-friendly, low-maintenance composite solution naturally resists insects and mold. The unique formulation includes rice hulls and recycled plastic and is more stain and scratch resistant than most other composite options. Preservative- and biocide-free, Terratec combines principals of conservation with practical engineering and ease of use. In North America, the product line features Traditional Deck Boards that install with screws through the surface, and Architectural Boards, which installs in up to half the time with Terratec's own Quick Clip no-visible-screw building system.
- **Prefinished Extreme Tropical Hardwoods**—Now available prefinished, McFarland Cascade's Extreme Tropical Hardwood line offer richness and durability when nothing but real wood will do. Available in EXTREME TIGERWOOD, EXTREME ANGELIM and EXTREME MERBAU, their dramatic grains and distinctive colors can add value and elegance to any home, while their natural resistance to fungi and termites offer maintenance benefits.

- more -

- **Stonedecking**—These light-weight natural stone tiles backed with a high-strength composite will install on standard above ground deck frames with no additional substructure required. It can be used for an entire project or as an accent.
- **RhinoDeck®**—Recognized as a quality wood alternative in the building industry, this composite decking system is comprised of 50 percent recycled HDPE and 50 percent recycled wood fibers. People who have used RhinoDeck have helped America recycle more than 1 billion plastic containers a year. It's splinter free, requires no painting or staining and installs like traditional wood.
- **Dry Snap and Rain Escape**—Homeowners can maximize outdoor living spaces—even during rainy days—by transforming unsightly under-deck overhangs into dry and attractive usable spaces. Gain an outdoor living room or a dry storage space for lawn and gardening equipment, bikes, and more.
- **Cascade Railing**—Clean lines are the defining features of Cascade Railing. It's stylish simplicity fits with modern or period architecture, making it the perfect choice for understated elegance to fit with any deck or porch. With the option of a variety of railing and baluster styles, the complete, do-it-yourself kit offers easy installation.

For more information, or to receive McFarland Cascade's catalogue featuring its complete line of products, call (800) 426-8430, or download it online at www.mcfarlandcascade.com.

The Oregon Remodelers Association and the National Association of the Remodeling Industry (NARI) will present the show—the largest of its kind on the West Coast—at the Oregon Convention Center.

The 33rd annual Home Improvement and Remodeling Show hours are 2-8 p.m. Thursday, Sept. 25; 11 a.m.-8 p.m. Friday, Sept. 26 and Saturday, Sept. 27; and 11 a.m.-6 p.m. Sunday, Sept. 28. Tickets may be purchased at the door for \$10 for adults, \$4 for children ages 7-12, and free admission for children under age 7. Call (800) 863-9119 for more information.

At McFarland Cascade, the best outdoor projects start with the best materials. A manufacturer and distributor of pressure-treated consumer lumber, composite decking and other products that are sold through quality retailers throughout the West, the company began as a producer of poles and pilings in Sandpoint, Idaho in 1916.
