McFarland Cascade products featured on TLC's 'Little People, Big World'

Roloffs explore decking solutions in Nov. 10 episode

When the Roloffs want to improve their outdoor living space, they turn to Tualatin, Ore., contractor Romi Botez of American Classic Deck. And Botez points the Roloffs to two McFarland Cascade products to meet their needs.

In the Nov. 10 episode of the popular 'Little People, Big World' series Botez and McFarland Cascade's Area Sales Manager for the Portland area John Hedges help Matt Roloff with his latest home improvement project.

McFarland Cascade's StoneDeck™ and Pressure Treated Wood are used to create a new deck surface.

'Little People, Big World,' follows the lives of the Roloff family who live in outside of Portland. Parents Matt and Amy and son Zach are little people, while Zach's twin Jeremy as well as younger siblings Molly and Jacob are average height.

The fourth season of the show began on Oct. 13. The popular show has aired on Cable's TLC since March of 2006.

Botez is a McFarland Cascade certified contractor and participates regularly with Hedges in local trade shows. Both Botez and Hedges were interviewed during the taping of the show.

StoneDeck™ is a light-weight natural stone tile backed with a high-strength composite that will install on standard above ground deck frames with no additional substructure required. StoneDeck provides a genuine stone decking alternative that eliminated the need for substructure reinforcement. It can be used for an entire project or as an accent.

McFarland Cascade's Pressure-Treated Wood is a popular choice for outdoor products. Sold at contractor supply and consumer home improvement stores throughout the Northwest, varieties of the soft-cedar toned lumber are used for decking substructures, surfaces, framing, railings and outdoor structures. Treated with Copper Azole, it meets American Wood Preservers Association standards. Purchased from select mills, it is #2 grade and better, third-party inspected, then sorted at the McFarland Cascade plant to remove off-grade pieces.

For more information about McFarland Cascade products, or to receive McFarland Cascade's catalogue featuring its complete line of products, call (800) 426-8430, or download it online at www.mcfarlandcascade.com.

At McFarland Cascade, the best outdoor projects start with the best materials. A manufacturer and distributor of pressure-treated consumer lumber, composite decking and other products that are sold through quality retailers throughout the West, the company began as a producer of poles and pilings in Sandpoint, Idaho in 1916.
