**Experience McFarland Cascade Decking at the Portland Home & Garden Show**  
*Consumers can catch a vision for backyard living spaces Feb. 21-25*

**Portland, Ore.**—At the Portland Home & Garden Show Feb. 21-25, consumers can explore McFarland Cascade’s unique decking solutions in 3-D. They also can get the help of local deck contractors to create customized outdoor living options.

In the show’s Housing Resource Center section, McFarland Cascade’s 20 x 20 foot booth includes true scale models of the company’s most popular decking and rail products. People can walk on the deck surfaces, inspect the products, and ask questions of McFarland Cascade staff members and certified contractors.

At booth 1760, consumers can learn how they can get the company’s “Do It Yourself” deck design software, pick up samples and product information, meet with a qualified installer and get general cost estimates. Those wishing to receive estimates should have estimated deck square footage available.

McFarland Cascade’s premier decking and railing lines that will be on display at the Portland Home & Garden show includes:

- **Stonedeck™**—Featured in Sunset Magazine in August of 2005 and 2006, these light-weight natural stone tiles backed with a high-strength composite will install on standard above ground deck frames with no additional substructure required. Stonedek can be used for an entire project or as an accent.
- **Extreme Tropical Hardwoods**—When nothing but real wood will do, McFarland Cascade’s Extreme Tropical Hardwood line offer richness and durability that choosy customers appreciate. Their dramatic grains and distinctive colors can add value and elegance to any home, while their natural resistance to fungi and termites offer maintenance benefits.
- **Xtendex®**—A rice-hull-based composite that naturally resists insects and mold, Xtendex features the Quick Clip no-visible-screw building system. This wood-free choice is more stain and scratch resistant than most other composite options and installs in up to half the time. It combines principals of conservation with practical engineering and ease of use.
- **DrySnap and Rain Escape**—Homeowners can maximize outdoor living spaces—even during rainy days—by transforming unsightly under-deck overhangs into dry and attractive usable spaces. Gain an outdoor living room or a dry storage space for lawn and gardening equipment, bikes, and more.

The Portland Home & Garden Show takes place at the Portland Expo Center Feb. 21-25. Tickets are \$10 general admission for adults, \$5 for children ages 6 to 12 and free for children ages 5 and under and members of the American Horticultural Society. Tickets are available during show hours or may be purchased in advance at [www.otshows.com](http://www.otshows.com) or call (503) 246-8291.

*McFarland Cascade—the outdoor projects people—enhances the quality, style and comfort of exterior home projects. A manufacturer and distributor of pressure-treated consumer lumber, composite decking and other products that are sold through quality retailers throughout the West, the company began as a producer of poles and pilings in Sandpoint, Idaho in 1916.*
